

NOVEMBER 12, 2014

WORKING FORESTS *for the 21st Century*

*Norman Worthington Conference Center
Saint Martin's University, Lacey, Washington*

Presented by the Washington State Society of American Foresters, this one-day conference will focus on balancing social, ecological, and economic products and values from Working Forests.

Speakers will examine topics on forest science for the future, climate change adaptation, forest infrastructure and markets, innovations in wood architecture, early successional habitat, carbon sequestration, and examples of managing Tribal, community, and family working forests.

The target audience is wide ranging and includes decision makers, owners of working forests, and those who influence working forests.

Working Forests for the 21st Century

Agenda — November 12, 2014
