

Invasive Species and Disturbance in the Urban Forest

2013 Alaska Society of American Foresters Annual Meeting

Coast International Inn, Anchorage, AK • April 24-27

This annual meeting of the Alaska SAF will focus on invasive species and disturbance in urban forests. We have an interesting program prepared including general information on invasive species followed by specific case studies. We will go on a field trip visiting disturbance events from the September 2012 wind storms in and around Anchorage. Finally, our last field trip will visit sites where invasive species such as *Prunus padus* (European bird cherry) have taken hold and see the effects on the native ecosystem. CFE Credit will be available at the meeting: see www.forestry.org/alaska for details and agenda.
