

Can a Working Forest be a Restored Forest

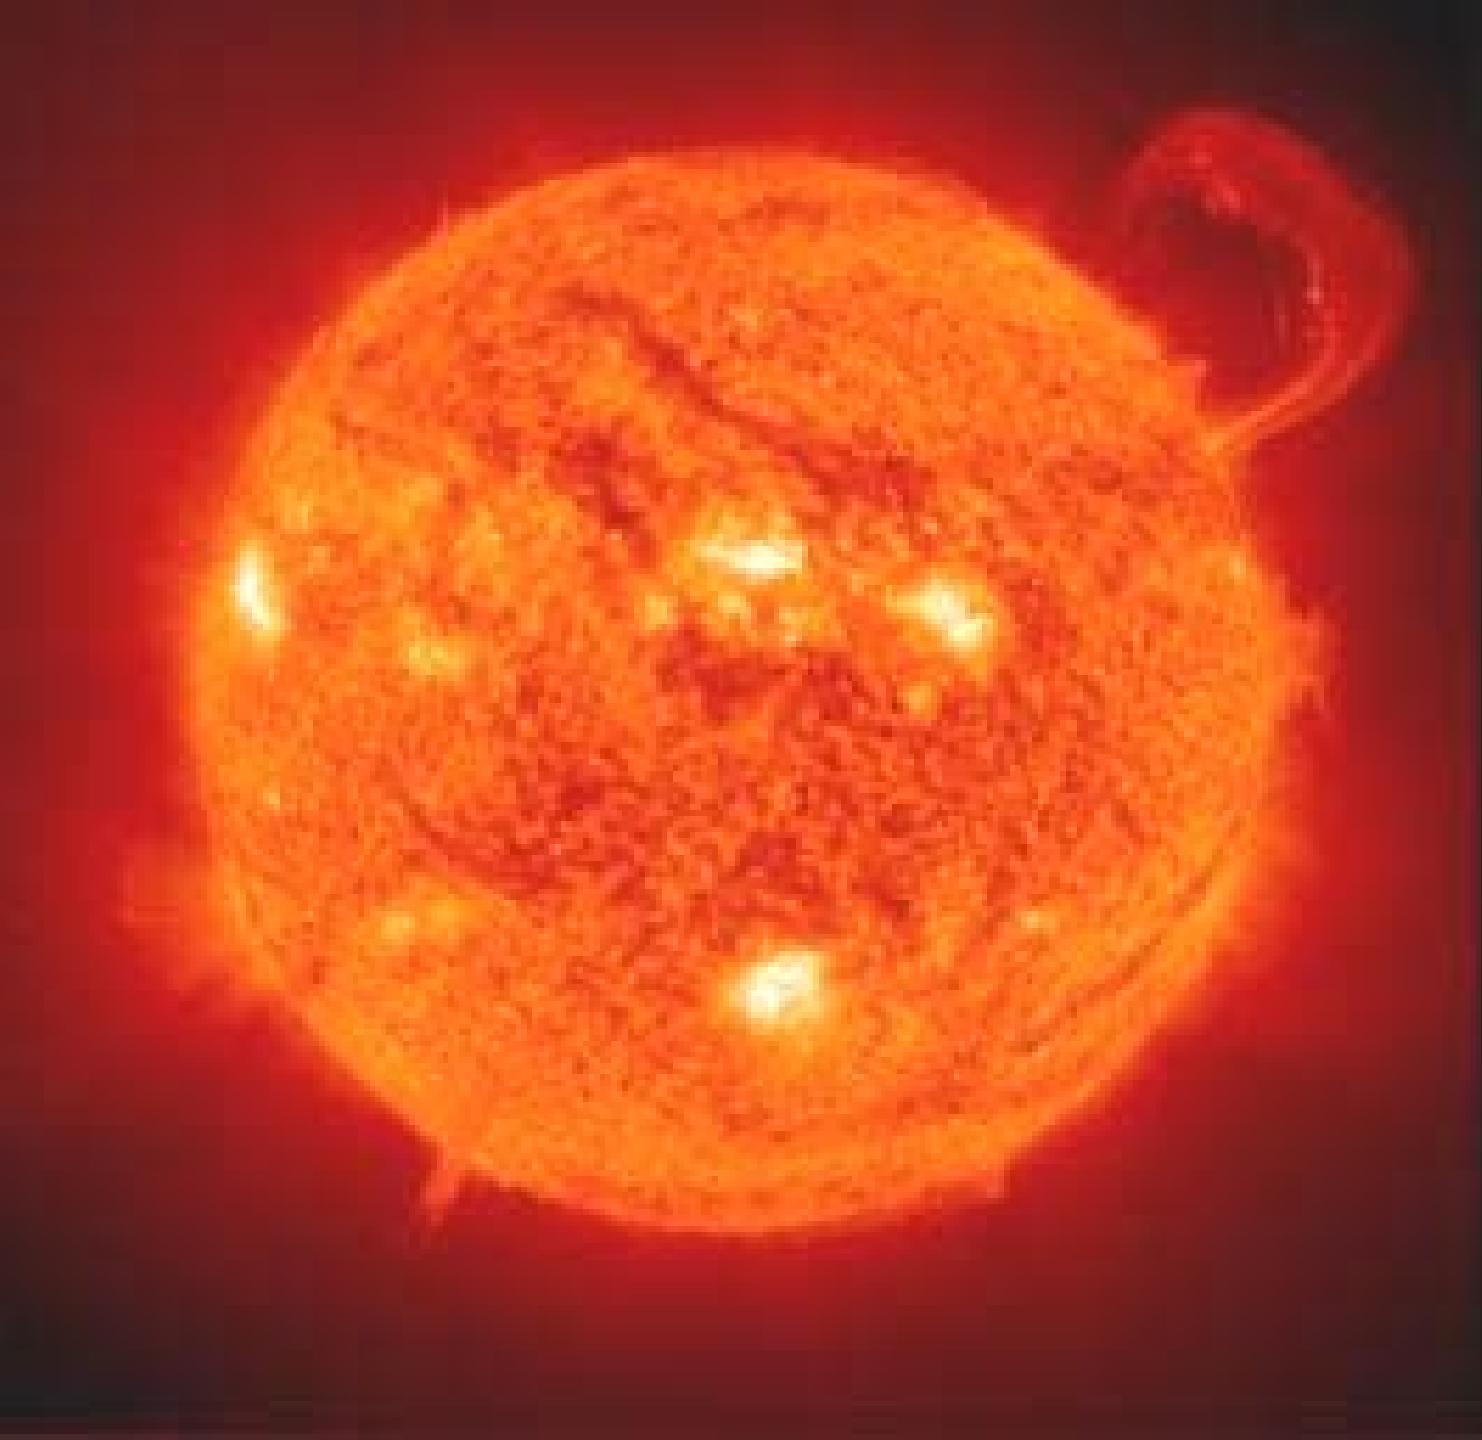

Define some Terms

- **Restored Forest** is a term we use to describe the outcome we desire or achieve
- **Managed Forest** is applied to forests that we impact and influence with our actions
- **Productive Forest** is a term to describe the outputs from a forest based on our value system

Time / Spatial Consideration

River Juma, Amazon region, Brazil

So how do we define ‘Restoration’

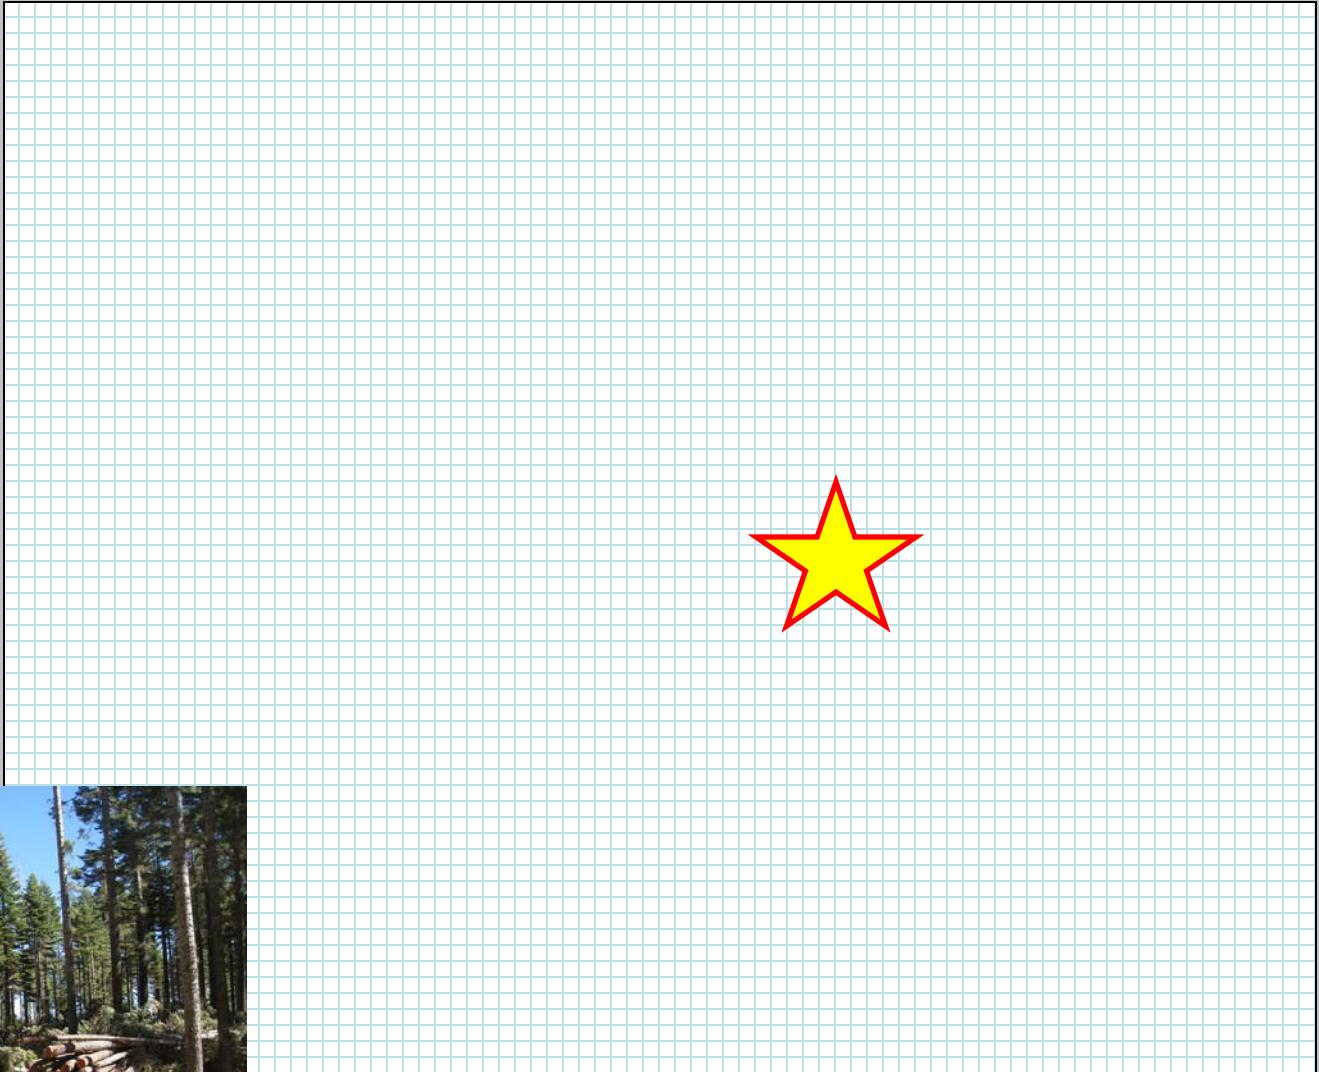

Onion Summit, Tehama Co, CA

Restoration

+
